We are still in
The We Are Still In Declaration, is a joint statement of support for the Paris Agreement, signed by governments, academia, tribes, health programs, cultural institutions, and the private sector.

Its signatories comprise the largest and most diverse Coalition ever established in pursuit of climate action. Together, these organizations are harnessing the power of cross-sectoral partnerships to build local networks of support, provide reassurances to the international community, and ratchet up their own ambition.

A broader Movement has emerged. Cultural institutions are the sector best-prepared to help individuals and organizations develop shared approaches to addressing climate change, representing the greatest inequities and dangers of our time.

June 1, 2017

United States announcement of planned withdrawal from Paris Agreement. #MuseumsforParis launches

June 5, 2017

#WeAreStillIn goes public without a category for museums

February 2018

We Are Still In adopts the Cultural Institution sector, providing much-needed public engagement facet to the coalition
We Are Still In is organized by 23 groups

• The Secretariat manages the day-to-day operations. It is made up of the World Wildlife Fund, Ceres, and Climate Nexus.

• The Leadership Team and Executive Committee coordinate the participation of the more than 3,500 signatories from higher education, faith organizations, health care organizations, business and investors, state and tribes, and cities and counties, and cultural institutions.
3,500+ Signatories across all 50 States

Representing more than half of all Americans and $6.2 trillion, a bigger economy than any nation other than the U.S. or China:

| 287 Cities and Counties | 10 States |
| 2187 Businesses and Investors | 350 Colleges and Universities |
| 10 Tribes | 59 Cultural Institutions | 900+ Faith Groups |
| 25+ Hospital Systems and Health Care Organizations | 28 Artists |

As of Fall 2018
In the Cultural Sector, Who’s Signing On? (a sampling)

American Association for State and Local History (AASLH)
Association of Science - Technology Centers (ASTC)
New England Museum Association
Museum Association of Arizona

Brick Store Museum, ME
American Swedish Institute, MN
New England Aquarium, MA
Manoa Heritage Center, HI
Monterey Bay Aquarium, CA
Sangre de Cristo Arts & Conference Center, CO
Vizcaya Museums & Garden, FL

Strawberry Banke Museum, NH
ECHO, VT
Abbe Museum, ME
NC Museum of Life & Sciences
Madison Childrens Museum, WI
Phipps Conservatory, PA
Science Museum of Minnesota

As of Spring 2019
Purpose of Cultural Institutions in WASI

• **Align** the abilities, resources, and influence of our sector with the work and resources of other sectors to help our communities understand their connection to environment and climate, and to prepare for a changing climate

• To use *education, research, and communication* to foster individual, collaborative and collective action, from every sector, to pursue an equitable approach for significant environment and climate impact
Benefits for Cultural Institutions

• **Demonstrate** relevance to public concerns and interests
• **Access** better tools and information for advancing sustainability within your organization
• **Gain** peer mentors to help you do this more effectively
• **Share** your progress and experience with museum partners and outside the sector
• **Raise** your profile locally and nationally

Eventually, **increase** your potential for funding from a growing philanthropic interest in collaborative climate efforts
What is the We Are Still In Declaration?

We, the undersigned mayors, county executives, governors, tribal leaders, college and university leaders, businesses, faith groups, cultural institutions, healthcare organizations, and investors are joining forces for the first time to declare that we will continue to support climate action to meet the Paris Agreement.

In December 2015 in Paris, world leaders signed the first global commitment to fight climate change. The landmark agreement succeeded where past attempts failed because it allowed each country to set its own emission reduction targets and adopt its own strategies for reaching them. In addition, nations - inspired by the actions of local and regional governments, along with businesses - came to recognize that fighting climate change brings significant economic and public health benefits.

It is imperative that the world know that in the U.S., the actors that will provide the leadership necessary to meet our Paris commitment are found in city halls, state capitals, colleges and universities, investors and businesses. Together, we will remain actively engaged with the international community as part of the global effort to hold warming to well below 2°C and to accelerate the transition to a clean energy economy that will benefit our security, prosperity, and health.
What is a Cultural Institution Commitment?

They are you-driven:

There are 12 commitments to choose among
You can add others at any point
For each you select, you first state that you plan to or are doing this
Then you set the target and the timeline, and edit or update as needed

Fulfilling commitments is a process unique to each institution and each setting
Some you’ll know how to fulfill
Others you’ll want help to complete. That’s the value of We Are Still In.
Commit to Increase Your Use of Renewable Power
This includes onsite generation, renewable power purchasing agreements, and purchasing energy credits

Commit to Designing and Hosting a Cross-Sectoral Forum at your Institution
Commit to holding a public campus and community forum or workshop on shared climate action plan goal setting and/or resilience assessments. These forums will compare baseline targets and align the strengths of the respective sectors to drive solutions.
Short Versions of Others

Understand and Reduce Your Greenhouse Gas Emissions
Reduce Climate Impacts of Packaging and Reducing Waste
Reducing the Climate Impact of Your Transportation
Building Climate Resilience in your Community
Becoming an Environmentally Responsible Cultural Institution
Energy Conservation and Resiliency in Collections
Reducing Materials Consumption and Waste
Community Education and Communication
From the WASI homepage, either of these links will bring you to the portal for taking action.
For institutions who are already a WASI signatory, you have an email/username linked account.

For new institutions who are not yet signatories or want to submit a contribution without signing:
